eXtreme Programming, a Quick Introduction

Didier Besset
(Sogeti, Switzerland)

Abstract. eXtreme Programming (XP) is a methodology for software developments that originated in the states about 5 years ago. Originally born among Smalltalkers, it has gained wide acceptance among Java developers in the recent years. Unlike other methodology such as RUP, XP is not a product that can be bought in a box or from a series of consultants. eXtreme Programming is foremost a philosophy, which is transmitted to a whole team of developers in order to increase its efficiency.

Additional Information

The seminars are given in the ISDC "Pavillon" building
Address: INTEGRAL Science Data Centre, ch. d'Écogia 16, CH-1290 Versoix
